EXPERIENCE

Sodexo Dietetic Internships, Dietetic Intern • May 2019 - July 2020

Internship Highlights

- Brigham and Women's Faulkner Hospital • *Boston, MA*
 - Utilized the Nutrition Care Process to assess, diagnose, and monitor patients in a 162-bed, community-teaching hospital along with an interdisciplinary team.
 - Worked in clinical, patient services, and clinical nutrition management roles.
 - Completed a professional research presentation entitled, "The Microbiome-Gut-Brain Axis and Probiotics Supplementation: Implications for Dementia and Alzheimer's Disease."
- Covenant Living at the Shores Retirement Community • *Mercer Island, WA*
 - Worked along side nursing staff, care coordinators, and dietary staff to manage resident needs.
 - Applied the Nutrition Care Process to patients in the skilled nursing, memory care, and rehabilitation center and completed required MDS reporting.
 - Presented on the importance of nutrition for better sleep at a monthly wellness talk.
- Café Mario at Nintendo of America • *Redmond, WA*
 - Participated in supporting all facets of the operation, including food production, retail, and administration.
 - Increased revenue through a retail marketing event highlighting healthy breakfast options.
 - Researched and completed a systems analysis project to support sustainability in the Café.

Forest Ridge School of the Sacred Heart, Residential Faculty • August 2015 - August 2018

Bellevue, WA

- Provided guidance and support to students in the development of life skills by creating an environment conducive to personal growth.
- Created and implemented a nutrition and health student curriculum for international boarding students to help with acclimation to a new culture.
- Worked in a school food service program to prepare and serve whole-food based meals daily to international high school students, including accommodating speciality diets.

Bastyr Center for Natural Health, Student Clinician • January 2018 - June 2018

Seattle, WA

- Carried out patient interviews and assessments surrounding multiple medical conditions under the guidance of a Registered Dietitian.
- Created nutrition recommendations using evidence-based research under the supervision of an RD.
- Collaborated with other student clinicians regarding assessments of patients' nutritional needs.
